IDOT – South Main Patching

- **Illinois Department of Transportation (IDOT) – South Main Patching**

Due to the condition of many portions of South Main and with the upcoming reconstruction project, the City of Rockford has requested IDOT perform a patching project in order to sustain the road until next year.

IDOT will mill and resurface South Main Street (IL Route 2) from Pond to Ogilby and Indiana to Lane. This will include all four lanes of traffic. South bound lanes from Lane to Montague and Loomis to Morgan will also be done. The project is set to begin on September 6th and last 15 days.

Proper traffic control devices will be in place. Motorists are urged to use caution while driving in this area.

The South Main St. Reconstruction Project from Cedar St. to Pond St. and Pond St. to Beltline Rd. will begin in the summer of 2012 and continue into 2013. The project will consist of, but not limited to, road reconstruction, water main replacement, sanitary repairs, new sidewalk and multi-use path, streetscape design, new street lights, and resurfacing on the some of the ramps for Bypass 20.
